
Start
12V Power Input
DC Supply
DC-DC Converter
12V --> 5V
Power Arduino, MUX,
and Sensor Circuits
Initialize Arduino, I2C,
and LED
Select sensor channel via
CD74HC4067 multiplexer
Read conditioned analog
voltage using ADC
Are all 16
sensors
processed?
No
Yes
Convert readings to °C
Find highest temperature
Is the
highest
temperature >
60°C?
No
Yes
LED off
Blink red LED
